

Cybersecurity Solution

Who We Are

Spry Methods, Inc (Spry) is an agile and dynamic Small Business providing well-designed and purposeful, on the ground technical and security expertise to the DoD, Federal Civilian, Intelligence, and Law Enforcement Communities who sustain mission critical operations and development programs in support of our Nation's security.

What We Do

Each industry is constantly evolving and changing, requiring solutions that can be tailored to meet strategic initiatives and goals, and a partner that has the experience to get there. Security integration from the top down is the key to sensible, cost-effective security solutions. Our goal is to ensure that the organization accomplishes its assigned mission, protects its assets, fulfills its legal responsibilities, maintains its day-to day functions, and protects Individuals and their information. Our deep industry knowledge and responsiveness ensure that we continue to exceed our clients' expectations by delivering superior solutions and support to meet their mission critical needs.

Security Management & Compliance

Spry provides common sense security support with a full enterprise view and a focus on new and emerging technology and concepts that are cost effective, and when implemented will benefit the government.

- Continuous Monitoring
- Security Assessments & Authorizations
- Risk Management Framework
- Vulnerability Scanning & Management

Security Engineering & Integration

Spry's security experts and engineers help our customers assess their security requirements, architect to maximize security protection, assist in security integration, and provide a complete security solution.

- DevSecOps
- Cloud & Platform/Software/Infrastructure Security
- Cross Domain Management Solutions
- Penetration Testing
- Agile Security

Security Operations

Knowledge management and the intelligence provided by Spry cyber analysts drive a technology-based environment toward automation to gain efficiencies and effectively protect against current and evolving cyber adversaries and threats.

- Security Operations Center (SOC) Support
- Cyber Threat Analysis & Monitoring
- Intrusion Detection/Prevention
- Incident Response & Cyber Hunt
- Continuous Diagnostics & Mitigation (CDM)

Data Analytics

With advancements in robotics, artificial intelligence (AI), and machine learning, data and analytics reshape the business landscape and how IT is implemented to support business requirements, impacting data security, access, and how security controls are implemented.

- Threat Pattern Detection
- Data Exfiltration Detection
- Incident Investigation
- Predictive Intelligence
